SUMMARY

AI Engineer and Data Scientist with a strong foundation in machine learning, statistical analysis, and full-stack development. I build and deploy real AI systems end-to-end from model training and backend architecture to containerized, production-ready deployment. My current focus is agentic AI: designing multi-agent LLM pipelines that plan, research, self-critique, and synthesize, rather than relying on single-prompt wrappers. Equal parts data scientist and systems builder, I care as much about whether something ships cleanly as whether it works in a notebook.

EDUCATION

Sukkur IBA University, Sukkur, Pakistan Bachelor of Science in Computer Software Engineering, 2024-2028 (Expected)

AWARDS

SEEF Sindh Government Scholarship Sindh Education Endowment Fund (Government of Sindh)
July 2026 • Merit- & Need-Based Award

SKILLS

Programming Languages: Python, C++, Java, JavaScript

Agentic AI & LLMs: Multi-Agent Systems, Reasoning Pipelines, Prompt Engineering, OpenAI SDK, GitHub Models (GPT-4o/GPT-4o-mini), LLM Orchestration, Server-Sent Events (SSE)

Data Science & ML: Machine Learning, Statistical Data Analysis, TensorFlow, Keras, Matplotlib, Seaborn, Pandas, NumPy, Scikit-Learn, Deep Learning (CNN), Model Training & Evaluation

Web & Backend: FastAPI, Uvicorn, React 19, React Router, Context API, Django, HTML5, CSS, Tailwind CSS, Streamlit

DevOps & Deployment: Docker, Docker Desktop, Containerization, Hugging Face Spaces, Image Building, Port Mapping, Container Mapping, Container Deployment

Databases & Tools: SQL, Git, GitHub, Google Cloud, Google Gemini, API Integration, Microsoft Office

Concepts & Design: OOP, Data Structures, Tkinter, Figma (UI/UX), Prototyping, Wireframing, Color Theory

PROJECTS

ResearchPilot Multi-Agent Autonomous Research System

Python, GitHub Models, FastAPI, OpenAI SDK, SSE, Docker

Multi-agent AI reasoning system (Microsoft Agents League Hackathon, Reasoning Agents track). 4-agent pipeline (Planner, Researcher, Critic, Synthesizer) using the OpenAI Python SDK against GitHub Models; self-critique re-research loop triggers additional research when confidence falls below threshold. FastAPI + SSE real-time frontend; deployed on Hugging Face Spaces via Docker.

AgroVision AI Plant Disease Prediction System

Python, TensorFlow, Streamlit, Docker

CNN trained on 54,000+ images across 38 disease classes; 88% validation accuracy. Interactive Streamlit interface for image upload, preprocessing and instant prediction; containerized with Docker.

Canteen Token / Order Queue System

PHP, MySQL, HTML, CSS, JavaScript, XAMPP

Web-based canteen token and order queue system for Sukkur IBA University. Three-Tier Architecture with role-based access (Customer/Staff/Admin); FIFO queue, token generation, order lifecycle, live notifications. Singleton, Factory and Observer patterns; full UML documentation.

FitWise AI-Powered Fitness Assistant

Python, AI, Data Analysis

Customized workout plans based on fitness level, goals and equipment; AI-driven healthcare advice and weight-tracking visualization.

Movie Discovery App

React 19, React Router, Context API, LocalStorage

Movie discovery web app with real-time search, add/remove favorites and persistence via LocalStorage + Context

API.

ScriptFlow AI Video Script Generator

[Python](#), [AI](#), [API Integration](#)

Platform-aware video scripts with hooks, scenes and CTAs for YouTube, TikTok, Instagram and Ads in under 30 seconds.

Task Management App with GUI

[Python](#), [Tkinter](#), [OOP](#)

Desktop task management app with add/update/delete/view features, built with OOP principles.

HACKATHONS

ResearchPilot Microsoft Agents League Hackathon (Reasoning Agents Track)

[Python](#), [GitHub Models \(GPT-4o\)](#), [FastAPI](#), [OpenAI SDK](#), [SSE](#), [Docker](#) [see Projects for full details](#)

MediAssist Qwen Cloud Hackathon 2026 (MemoryAgent Track)

[Python](#), [Qwen AI \(qwen-plus\)](#), [MongoDB Atlas](#), [Streamlit](#), [Alibaba Cloud ECS](#) [AI health assistant with persistent cross-session memory](#)

Smart Photo Analyzer Build Small Hackathon 2026 (Hugging Face + Gradio, Backyard AI Track)

[Qwen2-VL-2B-Instruct](#), [Gradio](#), [Helsinki-NLP](#), [HF ZeroGPU](#) [English/Urdu image analysis for Urdu-speaking communities](#)

CERTIFICATIONS

- " Google Cloud Gen AI Academy APAC Edition (Cohort 1) Hack2Skill (Apr 2026) • ID: 2026H2S04GCGENAIAPACC1-P00917
- " Intro to Machine Learning Kaggle (Apr 2026)
- " Claude 101 Anthropic (Mar 2026) • ID: qagzx8ygpkae
